

Where Does the Rainbow End?

Where does the rainbow end? Does it reach up to the sky? Why is it colorful? Why? Why? Why? Does it go through your house? Does it go through the sea? Where does it go? Does it go through me?

Where does the rainbow end? Where does it go? Does it travel through Australia? Does anybody know? Where does the rainbow end? Where does it go? Does it travel through the U.S.A? Does anybody know?

Where does the rainbow end? It's just a mystery. Does it travel through Asia? Does it run through the sea? Follow your dreams and listen to me, you'll find it in your dreams. But for now.....Where does the rainbow end?
